29) The proposal of the Trust Board practically means that Rs 13,600 out of Rs 15 000 required during the current year for draining off the Dodkere Tank should be borne by Government and an additional grant sanctioned for the purpose this is not acceptable

30) The Trust Board must curtail the provision under other heads of expenditure in the Trust Budget for meeting this expenditure

31 The advance of Rs 13 600/- if not required for the purpose for which it was allowed should be refunded to Government and cannot be made available for other purposes There is no reason why this should be mixed up with the Dodkere drainage They are distinct items and should be dealt with independently

CHIEF SECRETARY
14 MAY 1934

34 With due regard to the views of the Financial Secretary, I regret I am unable to agree with him

35 The operations of the City Improvement Trust Board are entirely financed by Government from State Funds and all important works are carried out after obtaining Government Orders The drainage of the Doddakere Tank was a special work ordered by Government about the middle of October 1933 to be taken up as an urgent improvement work Work was started urgently and proposals submitted with an application for additional funds On receipt of subsequent instructions, that no fresh funds can be sanctioned this year and that the money required has to be made available out of this year's or next year's grant by putting off some items of expenditure, under acquisition, this office pointed out the source from which part of the amount required for expenditure could be appropriated The Financial Secretary has however observed that this re-appropriation is not acceptable and if it is not required for the purpose for which it was allowed it should be refunded It can only be said that this source was pointed out agreeably to the Government Order No L 6839 dated 14-3-1934 which suggested the putting off of acquisition of properties which were not urgent In this instance the acquisition is intended to be dropped for reasons already stated, though, it could have been utilised for the same purpose in other very congested areas, if this important work of draining the tank had not intervened

36 Further, the advance of Rs 13,600/- was made by Government on the understanding that it should be repaid in 3 years as sites were sold This meant that the Board had the advantage of repaying this sum in 3 years, which advantage, it is

now being deprived of More than all other considerations, the fact that a very big scheme has been undertaken by the Board, should be a sufficient ground for granting the Board's request as it virtually means that the grant to the Board will only have been increased by Rs 4,500/- every year for the next 3 years Since the grant was made subject to adjustment from the receipts from the sale of sites, it is doubtful if under present conditions the adjustment would have been made in 3 years at all I feel therefore that this case deserves a more sympathetic consideration

37 In view of the above, I request that the proposal made by me may kindly be approved and approval conveyed immediately, as the works are completed to the extent of a little over Rs 15,000/- and the bills are ready for payment It is not possible to curtail any expenditure under other heads this year as the commitments of the Board in respect of acquisitions are far advanced, and cannot be withdrawn

Draining off Dodkere tank, Bijapur dt-

Serial No

JE 3269

DEWAN S OFFICE
11 JUNE 1934
No 7862

38 There are two kinds of expenditure incurred by the Trust Board (1) expenditure chargeable to fin heads of account and met from the normal Government grant or from normal revenue and (2) expenditure und debt heads which is adjusted by recoveries etc The cost of draining off the Dodkere tank which is a final expenditure has to be -- and it is the intention of Government that it should be -- met by postponing other items of expenditure which should be of the same type and chargeable to final heads of account The special advance of Rs 13 600 sanctioned for a different purpose and recoverable in three years (or earlier if the sale proceeds of sites amount to that sum before the expiry of three years) automatically adjusts itself and cannot be made use of for meeting this final head of expenditure as now proposed

39 I would therefore state that the Trust Board may be informed that their proposal cannot be accepted that the amount required for draining off the Dodkere tank should be met by postponing other works chargeable to final heads of account and that the special advance of Rs 13 600 cannot be permitted to be appropriated for the purpose and has to be refunded to Government if the same is not required for the purpose for which it was granted

CHIEF SECRETARY 9 FEB 1934 9234

Sir

Adverting to Government Order No L 15-18/11 dated the 4th October 1933, conveying sanction to drain off the Doddakere tank, I have the honour to forward herewith an estimate amounting to Rs 72,000/- for opening a channel in the Doddakere bed to lead off the storm water as it enters the tank, and to fill up hollows and levelling ted, and to request that you will be so good as to obtain administrative sanction of Government thereto

The report accompanying the plans and estimates explains the nature and details of construction proposed The proposals have been generally approved by the Chief Engineer of Mysore when the Municipal Engineer discussed the matter with him on the 3rd instant As the earthen portion of the channel will have to be completed before the Hungar rains set in, arrangements have been made to start the work immediately on the strength of the D O letter No H O NO 45 dated 4th February 1934 from the Chief Engineer (Copy enclosed for reference) As this is a special work ordered by Government and as there are no funds available in the Budget Estimate of the City Improvement Trust Board of the current year, I request that administrative sanction may kindly be accorded to the full estimate and funds to the extent of at least Rs 15,000/- placed at the disposal of the Board to complete at least a part

of the earth work portion of the scheme before rains set in The detailed estimates are under preparation and will soon be submitted

I have the honour to be,

Sir,

Your most obedient servant,

Chairman

C.D

Copy of the D O Letter No H O No 45 from the Chief Engineer of Mysore, Bangalore to the Chairman, City Improvement Trust Board, Mysore

---

Thanks for your kind letters The Dewan has yesterday authorised Mr Krishna Iyengar in my presence to start the excavation of the contour channel You may kindly expedite the submission of the estimate to Government

CSD

Chairman

Report to accompany the estimate for opening a channel in the Doddakere bed to lead off the storm water

An estimate amounting to Rs 2,000/- for the above was sanctioned in the Ist instance by the Board at their meeting held on 10th January 1933 The work is being got done departmentally and the tank is practically drained off

The tank has a catchment area of 8 46 sq miles With a view to drain off the storm water as it enters the tank, without allowing water to stagnate in the bed and spread out, levels have been taken and the full estimate is under preparation Some bed sections are necessary to design the channel on a permanent basis and the same cannot be done until the bed dries up a bit and allow coolies to move about ~~fully~~ freely It is likely that rains may set in in the latter part of March 1934 If the tank is to be kept free from water an earthen channel of partial width at least, will have to be completed before the 15th March 1934 in order to give a direction to the storm water Pending submission of final proposals in the matter, permission may be kindly given to take up the work of excavation of drain and complete it before rains set in along the proposed line

On the basis of levels taken in the year 1928, a channel of 40' in width at bottom, side slopes ~~to~~ 1 to 1 and a fall of 2' per mile with provision to protect the sides and bed eventually is proposed to be constructed The channel will be capable of discharging 911 Cu feet per second after completion The total cost of the estimate as per details furnished will be Rs ~~56,000~~ 12 000/- To begin with a 30' width channel will be ~~elevated~~ excavated from the culvert on the cross road leading to Ittegegud and connected with the trench now excavated from the sluice towards the weir and beyond, taking the channel along contour so that it may be in cutting, as a straight line across the bed will involve double banking and heavy cost Besides, taking a channel in a contour will also be advantageous in view of any improvement to be done latter on, as the direction of the storm

water and sewage will be far off from the main road and the tank bed will be left for full treatment without being divided into a number of small parts A sum of Rs 15,000/- at least may kindly be sanctioned at the Ist instance to take up the earthwork portion of the channel

The direction of the main channel and the different sources of water supply to the tank are marked in the accompanying blue print for reference

Sir

3794

In inviting kind reference to this office letter No.798 dated the 8th February 1934 forwarding an estimate for Rs 72,000/- for opening a channel in the Doddakere bed to lead off the storm water w it enters the tank etc , I have the honour to state that as alread reported a part of the earthwork portion of the scheme is in full swing and the work is likely to be completed before the 15th instant

The work of draining ~~an~~ off the tank was done by Departmental agency and the expenditure so far incurred amounts to nearly Rs 1,50(As this is a part and parcel of the major scheme, the total cost of draining off the tank and the cost of excavating the main channel wi be included in the consolidated modified estimate which is under preparation as per classification of soil etc now done The work excavation of the main channel to a width of 30' is being got done by piece work system by distributing the work among 40 gangs of woddars

As the parties will have to be paid and as this is a special work ordered by Government, I request that you will be so good as t obtain the sanction of Government to place a sum of atleast Rs 15,00(immediately at the disposal of the Board as already requested

To

The Chairman,
City Improvement Trust Board,
M y s o r e.

Sir

With reference to your letter No.798 dated 7/8th February 1934 requesting sanction to the estimate for Rs.72,000 for draining off the Doddakere tank and to a sum of Rs.15,000 from State funds being placed at the disposal of the Board immediately for completing the earth work portion of the scheme, I am directed to state that on account of financial stringency it is not possible to make any special grant from State funds for this work during the current or the next year. The expenditure on the scheme should therefore be limited to Rs.15,000 for the present and this sum should be met from the funds of the Trust Board this year or the next If necessary, acquisition of some properties may be put off and the money intended therefor utilised for the work in question

The detailed estimates for the scheme said to be under preparation may be sent up to Government in due course for sanction.

I have the honour to be,
Sir,
Your most obedient servant,

Ajuba Rao

The Chief Secretary
to the Government of His Highness the Maharaja of Mysore,
Bangalore

Sir

With reference to your letter No L 6839/M1 136-33-6 dated 14th arch 1934 stating that it is not possible to make any special grant from State Funds during the current ~~year~~ or next year for draining off the Doddakere tank, that the expenditure on the scheme should be limited to Rs 15,000/- for the present and that this sum should be met from the funds of the Trust Board, putting off if necessary, the acquisition of some properties, I have the honour to state that though there are several sanctioned acquisition schemes pending execution, provision has been made in the current year's budget for only a few works which were considered urgent and important As it is not desirable to put off these schemes, I request that Government may be pleased to accord sanction to appropriate for the purpose, the sum of Rs 13,600/- sanctioned in Government Order No L 7410-11/M1 34-32-21 dated 12/13th May 1933 as an advance for meeting the cost of acquisition of certain survey lands of the Mysore Kasaba Village for further expansion o the Chamundy Extension This scheme has since been found to be unremunerative, as there is no demand at present for building site in that part of the extension It has therefore been under the consideration of the Board to abandon the said scheme and to utilise the said sum of Rs 13,600/- for the acquisition of the in

-sanitary houses in Besthageri, Krishnaraja Mohalla and certain garden lands below Doddakere tank to provide accommodation for the displaced people But, as there is already a big scheme costing about Rs 75,000/- for acquisition of lands below Doddakere, I consider that the question of acquiring houses in Besthageri which though urgent may be taken up while working out the larger scheme and that the sum of Rs 13,600/- may be utilised now for draining off the Doddakere tank, for which there are no other funds available and in view of the work itself having been taken up and considerabl progress made

I request therefore that you will be so good as to place the matter before Government and obtain their kind sanction to treat the said sum of Rs 13,600/- as a special grant to the Trust Board instead of an advance repayable in three years and to utilise it for draining off the Doddakere tank during the Current year The balance of Rs 1,400/- required for the work will be met by re-appropriation of sanctioned grants in the current year's budget

I also request that sanction of Government may be kindly obtained to withdraw from the acquisition proceedings in respect of the Survey lands of the Mysore Kasaba Village for the acquisitio of which the advance of Rs 13,600/- was sanctioned by Government The Assistant Commissioner, Mysore Sub-Division has passed awards in these cases But possession of the lands has not yet been taken nor the compensation amount paid

No 1025

OFFICE OF THE CHAIRMAN
CITY IMPROVEMENT TRUST BOARD
MYSORE

Dated 13th April 1934

From

B T KESAVAIENGAR ESQUIRE B A
CHAIRMAN CITY IMPROVEMENT TRUST BOARD
MYSORE

To

The Chief Secretary
to the Government of His Highness the Maharaja of
Mysore

Sir

With reference to your letter No 7306/M1 136-33-8 dated 11th April 1934 enquiring whether the amount of Rs 13,600/- sanctioned to the Trust Board in Government Order No L 7410-11/M1 34-32-21 dated 13th May 1933 as an advance for meeting the cost of acquisition of lands in Mysore Kasaba village for further expansion of the Chamundy Extension has been drawn, I have the honor to state that as the Sub-Division Officer, Mysore had passed awards in respect of the said lands and was pressing for payment, the advance of Rs 13,600/- was drawn on 30th June 1933 and kept with the Trust Board after executing the required bond

2 Subsequently, before sending the amount to the Sub-Division Officer, it was ascertained that there was no demand for sites in that part of the extension, that several sites which had been formed in the adjoining Survey lands and offered for sale by a private individual were lying vacant for want of bidders and that the scheme of acquisition of lands there would not be remunerative and consequently that it would not be possible to recoup the advance within the period prescribed by Government In these circumstances, the matter was placed before the Board at their meeting held on 31st October 1933 and it was resolved that the scheme of acquisition of lands near Sewage Farm might be dropped and that the question

of utilising the funds ear-marked for that purpose might be considered after full particulars for acquisition and lay-out of other suitable lands (Besthageri in Krishnaraja mohalla and some garden lands below Doddakere tank) were furnished A copy of the said resolution is enclosed for reference While these schemes were still engaging the attention of the Board, the work relating to the draining off of Doddakere tank was ordered to be put in hand in the early part of December 1933 Accordingly the work was put in hand and an estimate for the work amounting to Rs 72,000/- was submitted for sanction in this office No 798 dated 8th February 1934 with a request to sanction a special grant of at least Rs 15,000/- during the current year to complete a portion of the work But as the Government directed that the amount of Rs 15,000/- required for the work should be met from the funds of the Trust Board putting off certain acquisition schemes, it was submitted in this office letter No 1004 dated 3rd April 1934 that the advance of Rs 13,600/- sanctioned for acquisition of survey lands might be utilised for this purpose The Trust Board have also approved of this proposal (vide their Resolution No IX dated 11th April 1934 copy of which is enclosed for reference)

3 In these circumstances, the advance of Rs 13,600/- drawn by the Trust Board was not sent to the Sub-Division Officer It is available with the Trust Board I request that early sanction of Government may kindly be obtained to utilise this amount for draining off the Doddakere Tank as already requested

I have the honor to be,

Sir,

Your most obedient servant,

Chairman
